

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions, and listings of claims in the application.

Listing of Claims:

Claim 1. (Currently Amended): A molding composition [comprising] consisting essentially of

- A) 40 - 95 parts by weight (in relation to 100 parts by weight of the total composition) of aromatic [polycarbonate] homopolycarbonate and/or polyester carbonate
- B) 10-35 parts by weight (in relation to 100 parts by weight of the total composition) of (co)polymer based on vinyl monomers
- C) 1 - 25 parts by weight (in relation to 100 parts by weight of the total composition) of silicone acrylate graft rubber and
- D) 0.4 - 40 parts by weight (in relation to 100 parts by weight of the total composition) of mineral filler.

Claim 2. (Original): The composition according to Claim 1, in which component C is prepared by graft polymerization of aromatic alkenyl compounds and a vinylcyanide onto a composite rubber that contains a polyorganosiloxane rubber component and polyalkyl(meth)acrylate.

Claim 3. (Original): The composition according to Claim 1, wherein component B is a (co)polymer of at least one monomer selected from the group consisting of vinyl aromatics, vinyl cyanides, methacrylic acid-(C₁-C₈)-alkyl esters, unsaturated carboxylic acids and derivatives of unsaturated carboxylic acids.

Claim 4. (Original): The composition according to Claim 1, wherein component B is a copolymer of

B.1 from 50 to 99 parts by weight (in relation to 100 parts by weight of B) of vinyl aromatics and/or methacrylic acid-(C₁-C₈)-alkyl esters and

B.2 from 1 to 50 parts by weight (in relation to 100 parts by weight of B) of a member selected from the group consisting of vinyl cyanides

methacrylic acid-(C₁-C₈)-alkyl esters, unsaturated carboxylic acids and derivatives of unsaturated carboxylic acids.

Claim 5. (Previously Presented): The composition according to Claim 1 wherein the amount of mineral filler is 1 to 30 parts by weight.

Claim 6. (Previously Presented): The composition according to Claim 1 wherein the mineral filler is at least one member selected from the group consisting of glass fibers, glass spheres, mica, silicates, quartz, talc, titanium dioxide and wollastonite.

Claim 7. (Original): A method of using the composition according to Claim 1 comprising molding an article.

Claim 8. (Original): The article prepared by the method of Claim 7.

Claim 9. (Original): A molded article comprising the composition of Claim 1.

Claim 10. (Previously Presented): The composition of Claim 6 wherein the mineral filler is glass fibers.
